1 a local window, taken from a real build

2 its D4 orbit: eight images, one bin

3 the 77-d descriptor

A local 2×2×2 occupancy-pattern histogram: 55 D4-orbit bins, the all-empty bin dropped
B thickness histogram (5) C height profile, 8 slabs floor to ridge
D 9 global scalars: thickness mean and p90, surface/volume, wall fraction, yaw symmetry, interior ratio sealed and open, height entropy, log1p(blocks)
